

Hyland produces and sells sand and gravel from its own gravel pit and leased pits in the Comox Valley.

The production operations utilizes a stationary crushing plant to process aggregate from raw pit run material into a vast array of products.

Hyland can arrange to deliver all of its sand and gravel products. For remote placement Hyland has several rock slingers, which can throw the aggregate into place with great accuracy.

Hyland produces a broad range of sand products including:

- 2MM sand (Masonry)
- 3MM Sand
- R-Mix sand
- C-33 sand
- Block sand
- Bed sand

Hyland also produces a wide range of gravel products:

- Pea gravel 3/8"
- Curb mix 3/8"
- Drain rock 3/4"
- Drain rock 1 1/2"
- Navy Jack 3/4"
- Crushed stone 3/4"
- Road crush 3/4"
- Screened pit run
- Over size
